CORSIA Update

Introduction

[Industry Notice 26](#) provided details on the Carbon Offsetting and Reduction Scheme for International Aviation (CORSIA).

CORSIA applies to international flights between participating States by aircraft operators that produces annual CO₂ emissions greater than 10 000 tonnes from the use of an aeroplane(s) with a maximum certificated take-off mass greater than 5 700 kg conducting international flights, on or after 1 January 2019, with the exception of humanitarian, medical and firefighting flights.

Submission of Emissions Monitoring Plans

Operators who are subject to the scheme will be required to submit an Emissions Monitoring Plan to the UK Environment Agency for approval by the end of September 2018. However, operators are advised to hold on to completed plans pending UK Environment Agency publication of the process for submission. We will publish further guidance in due course.

CORSIA Workshop– 11th July 2018 – London, UK

On 11 July 2018 the UK Department for Transport and Environment Agency will be delivering a workshop for operators of aircraft registered in the UK and the UK Crown Dependencies and Overseas Territories which will include presentations and demonstrations to guide operators in preparing for CORSIA. The agenda will include:

- What is the Carbon Offsetting and Reduction Scheme for International Aviation (CORSIA)?
- Preparing for the Monitoring Phase
- Estimating emissions: The CO₂ Estimation and Reporting Tool (CERT)
- Producing an Emissions Monitoring Plan
- Actions during the Monitoring Phase

If you would like to attend, please could you confirm this directly to Michael Evans (Michael.Evans1@dft.gov.uk) by email **before Wednesday 4th July 2018**. Due to restrictions on space at the venue, invited operators are requested to limit themselves to a maximum of 2 attendees.

IATA CORSIA Workshop – 25th / 26th July 2018, Geneva

An International Air Transport Association (IATA) CORSIA workshop is being held in Geneva, Switzerland on 25th and 26th July. This workshop will be dedicated to emissions monitoring plans and fuel use monitoring methodologies. Registration for this workshop is requested by email to corsia@iata.org by 4 July 2018.
