

Dangerous Goods Training Template

Introduction

The Civil Aviation (Carriage of Dangerous Goods) Order 2020 requires all operators or M- Registered Aircraft to be trained and assessed as required by the ICAO Technical Instructions for the safe carriage of Dangerous Goods by Air Transport.

Further guidance on the requirements for **all operators of M- Registered aircraft**, regardless of whether you carry dangerous goods or not, can be accessed from the [Flight Operations Section](#) of the IOMAR website.

Operators who wish to apply for approval to carry dangerous goods should refer to [RP4 Part 2 Chapter 5.5](#).

To assist operators of M- Registered Aircraft **who are not approved** to carry dangerous goods, the Registry has provided a training template.

Dangerous Goods Training Template

The Dangerous Goods Training Template is accessible from the [ARDIS Aircraft Users Homepage](#). Please contact aircraft@gov.im if you do not have access to ARDIS.

The Dangerous Goods Training Template, Examination Papers and Course Completion Certificate must be tailored to the operator's specific procedures. The Operator must: -

1. Insert your logo in the Master Slide View;
2. Customise the PowerPoint slide wherever text states "**<< Operator to...>>**";
3. Add the operator's Emergency Procedure into the "Safety Training" section on slide 70.
4. Amend the Training Certificate to include your company logo; and
5. Create a minimum of 4 questions on **each examination paper** to test the understanding of the candidates on the operator's specific emergency procedures (both examination papers include 18 pre-prepared questions).

Notes:

- i) The Operator does not need to submit the training material for approval.*
- ii) The customised training material and training records may be requested as part of the Registry's performance based oversight programme.*
- iii) Please contact Flight Operations at the Registry if you have any further questions.*
